

# Plug-in Documentation: fileManager

## 1. Overview

fileManager performs file operations like cutting, copying and pasting or opening files.

## 2. Dependencies

fileManager has no dependencies.

## 3. Gui changes

fileManager does not effect gui.

## 4. Signals

### 4.1 started

Gets system information.

### 4.2 file-activated

Opens each element of kwargs["files"] with kwargs["app"]. Uses platform spesific tools to find default app if kwargs["app"] is not specified.
