Plug-in Documentation: Settings

1. Overview

The settings plug-in load the settings from disk, sends to other plug-ins or changes on request.

2. Dependencies

settings doesn't have any dependencies.

3. Gui changes

Settings plug-in doesn't effect the gui. Menus for changing settings belong to other plug-ins.

4. Signals

4.1 started

onStart
Loads settings from disk.

4.2 request-settings

onRequestSettings
Sets kwargs["widget"].settings to self.

4.3 set-setting

onSetSettings
Sets kwargs["setting"] to kwargs["newValue"] if kwargs["newValue"] is valid.
Saves changes to disk.

4.4 revert-to-defaults
4.5 revert-default-settings

onRevertDefault
Loads default settings and saves changes to disk.

4.6 set-new-setting

onSetNewSetting
Adds kwargs["setting"], which is an instance of Setting, to settings and saves changes to disk.
